Storage Racks

Air Draulic “roller racks” are heavy duty, industrial storage racks designed to store heavy machine dies. Docking stations with alignment pins and safety gate are standard. Battery operated transport carts are also available.

This unit has 7 stations designed to house large “ring” dies.

Parts Storage Cabinets

This brushed aluminum cabinet houses small machine dies. The drawers are lined with cork. The roll-up doors conceal the roll out carts for the larger dies.

Crossover Stairways

Welded aluminum construction with fiberglass bar grating makes these units strong, but light enough to relocate.

Modular Platforms

These light duty platforms feature a no-tools design with ball detent locking pins for easy break down and storage.

Access Platforms

Custom made to your specifications. Aluminum diamond plate decking with bolt union handrails.
